

BRIO

GENERAL INFORMATION

BRIO is a source of plant and soil nutrients that maximizes crop vigor, improves root growth, and helps mitigate the effects of plant stress. It is designed to be applied in combination with other liquid fertilizer products. It can be soil or foliar applied. Before mixing BRIO with other products, always evaluate product compatibility by performing a jar test.

DIRECTIONS FOR USE

- Mix well before use
- Dilute product for application
- Conduct jar test for compatibility before mixing BRIO with other products

For crop-specific application rates, please contact your local sales representative.

1-1-1 GUARANTEED ANALYSIS

Total Nitrogen (N)	1%
1% Water Soluble Nitrogen	
Available Phosphate (P ₂ O ₅)	1%
Soluble Potash (K ₂ O)	1%

Derived from digested food materials, digested food byproducts, potassium sulfate, and byproducts of seaweed fermentation.
